PAYLOAD DRONE · SKU AX-MX410

MX4-10 Multi-Function Industrial Drone

5 kg payload, 10 km multi-function drone with loudspeaker, searchlight and drop thrower. Rescue-ready, with OEM/ODM support.

PAYLOAD	RANGE	MODULES	PROGRAMME
5 kg	**10 km**	**Speaker / light / thrower**	**OEM / ODM**

The **MX4-10** is a multi-function industrial drone built around mission modules rather than raw lifting power. With a **5 kg payload** and a **10 km operating range**, it carries a **loudspeaker**, a **high-intensity searchlight** and a **drop thrower**. Those three tools turn a drone into a practical rescue, security and public-safety platform. It is also available under our **OEM and ODM** programmes for agencies and integrators who want their own branding or modifications.

Loudspeaker. Lets the operator talk to people on the ground: guiding a stranded hiker, warning swimmers, telling trespassers to leave or directing a crowd at an event. In an emergency, a calm voice from above can make all the difference.

Searchlight. Lights up search areas, accident scenes and patrol routes at night. Paired with a camera, it helps crews find people and assess hazards after dark.

Key features

Multi-function modules. Loudspeaker, high-intensity light and drop thrower, swapped to suit the mission.

5 kg payload. Enough for life jackets, rescue lines, medical kits and supplies.

10 km range. Reach across large search areas, coastline and estates.

Public safety ready. Broadcast instructions, light up scenes and drop aid.

OEM / ODM support. Can be branded and adapted for agencies and integrators.
